Career Objective

Detail-oriented computer science graduate from BRAC University with hands-on experience in data cleaning, exploratory analysis, and basic web development. Passionate about transforming raw data into actionable insights and ensuring software quality through rigorous testing. Seeking an internship where I can apply analytical thinking, technical curiosity, and a collaborative mindset to solve real business problems. Eager to learn from industry professionals while contributing meaningfully to team goals.

Skills

- **Languages & Query:** Python (Pandas, NumPy), SQL (MySQL, PostgreSQL), JavaScript (ES6), HTML/CSS, Java (basics)
- **Data & Visualization:** Data cleaning, exploratory analysis, Matplotlib, Jupyter Notebook
- **QA & Testing:** Manual testing, Selenium (basic), Postman, etc
- **Web Development:** React.js (basic), Node.js (basic), REST APIs
- **Tools:** Git, GitHub, VS Code, Excel, Google Sheets
- **Core Competencies:** Analytical thinking, attention to detail, teamwork, documentation, fast learner

Academic Projects

- **Medical Outcomes Data Analysis** *Python, Pandas, Matplotlib*
Cleaned and normalized a real-world medical dataset (500+ records). Identified 3 key contributing factors to patient outcomes using correlation analysis. Presented findings in a visual report.
- **Data Analysis using Public Datasets** *Python, Seaborn, Jupyter*
Analyzed academic dataset to detect anomalies and trends. Performed missing value imputation and outlier detection. Delivered a concise analytical summary with visualizations.
- **Multivendor website:** *Node.js, PostgreSQL*
Designed normalized schema with 5+ pages. Made complex features using machine learning and stored procedures and generated Client/seller activity reports.
- **3D Ball Wreak (Game)** *Python, OpenGL*
Designed 5 different maps and added features of invincible mode, unnoticeable traps, etc
- **Portfolio Website & Git Workflow** *HTML, CSS, Git, GitHub*
Built responsive personal portfolio. Used Git for version control and published via GitHub Pages.

Education

Bachelor of Science in Computer Science and Engineering

2021 – 2025

BRAC University, Dhaka, Bangladesh

Relevant Coursework: Data Structures, Algorithms, Database Systems, Software Engineering, Web Technologies, Statistics for Data Science

Experience

- **Student Volunteer ROBU Event Coordination** *Sep 2023 – Mar 2024*
BRAC University Robotics Club
 - Coordinated logistics for university-wide workshops (100+ participants).
 - Managed queries and technical setup; received positive feedback.

- **Academic Project Data Cleaning & Reporting**

Course: Database Systems

Oct 2024 – Dec 2024

- Cleaned inconsistent CSV data using Python; reduced missing values by 40%.
- Generated summary statistics.

Additional Information

- **Languages:** Bengali (Native), English (IELTS 7.0 proficient reading/writing/speaking)
- **Sports:** runner-up in the RUAP Badminton cup, also good in cricket and football.
- **Availability:** Immediate for full-time internship or entry-level (flexible)
- **Availability for roles:** SQA, data analyst, project management, UX/UI designing, etc.
- **Interests:** Data-driven decision-making, software quality, open-source tools
